

ENABLE PEACE OF MIND IN SUPPLY CHAIN MITIGATE RISK IN PURCHASING BUILDING COMPONENTS SEMINAR

THURSDAY 22ND SEPTEMBER 2016
1/F, 180-182 HENNESSY ROAD, WANCHAI, HONG KONG

BACKGROUND OF THE EVENT

Recent incidents relating to the substandard performance of purchased building components have raised public concerns in public works quality and health.

To control the performance of the supplied components, specifiers like Housing Department and Water Supplies Department require suppliers to provide evidence to demonstrate the building components are in compliance with tender specification requirements through obtaining production certification approval or testing reports etc.

BSI understands the needs of the specifiers, on routinely dealing with a wide variety of challenges, demands and constraints such as the quality and safety of the purchased products, the supply chain visibility and traceability.

In this seminar, our speakers will share with you how these issues can be addressed, controlled and mitigated using a risk assessment approach in order to demonstrate your commitment to best practice procurement, add unrivalled reassurance to your procurement decisions and gain confidence and respect from stakeholders and customers alike.

HIGHLIGHT OF THE EVENT

- The overview of the challenges and the opportunity in mitigating the Supply Chain Risk in the Construction Industry
- The dissection of Kitemark™
 - The processes of Kitemark certification
 - The elements included in the Kitemark scheme
 - How the audit test plan and test clause are set
 - How Kitemark™ can help ensure product quality
