Society for Risk Analysis-Europe (SRA-E)

Society for Risk Analysis-Japan (SRA-J)

Society for Risk Analysis-Australia & New Zealand (SRA-A&N)

Korean Society of Environmental Toxicology (Koset)

INTRODUCTION

In the world today, we face greater insecurity and challenge than ever. When survivors of Indian Ocean Tsunami in 2004 and Hurricane Katrina in 2005 still groan, a devastating earthquake hit China in May 2008, the oil spill in the Gulf of Mexico, and several by deadly aftershocks, landslides, and storms.

Along with natural disasters, the international society also encounters shadows of fatal disease, food shortage, soaring energy price, and war. All of these threats pose remarkable risks to us at various scales, therefore coping with them requires for collaborative efforts of scientists, practitioners, and decision-makers.

RACR are biennial international conferences launched by the Risk analysis council of China Association for Disaster Prevention. RACR conferences aim to provide an International forum for specialists and stake holders in Risk analysis, crisis, crisis in response, and disaster prevention. RACR-2011 will be the third conference in this series, following the successful RACR-2007 in Shanghai and RACR-2009 in Beijing.

RACR-2011 will facilitate multidisciplinary collaboration among professionals to further contribute to risk analysis and crisis response, introduce advancement in research and practice, and help the dissemination of knowledge.

CALL FOR PAPERS

Abstracts (no more than 300 words) and papers are invited for submission in any of the listed fields on CONFERENCE TOPICS. We strongly recommend electronic submission.

Manuscripts will be reviewed by the programme committee in accordance with the standard practice and the criteria for the conference. Final acceptance is based on review of the full-length papers.

The official language of the conference will be English. All abstracts and papers MUST be submitted in English.

CONFERENCE TOPICS

1. The latest theory and methodology on risk analysis
2. Theory and methodology on crisis response
