

# International Forum on Sustainable Green City

It is well known that the mankind is now facing two major issues, namely climate change and shortage of resources in terms of energy sources, clean water and clean air. It is also globally agreed that the only solution to such issues is the construction of sustainable and green cities where all human beings live in these cities by adopting a proper life style to go green and concern our coming generations. In this international forum, experts will share with you all these solutions to tackle our imminent problems.
