Incident Investigation Process

Methodologies

You have to understand *what* happened before you can understand *why* it happened

Why do we need a methodology

- Determines the causes of an incident
- Uses problem solving tools to help with the analysis
- May reduce “investigator bias”
- Enables people to be held accountable. Doesn’t focus on blame
- Doesn’t focus on the goal of finding “the one” root cause which caused the incident to happen

Familiar methodologies?

Cause-and-Effect Relationship Building Block

Cause Mapping

1 Problem Definition

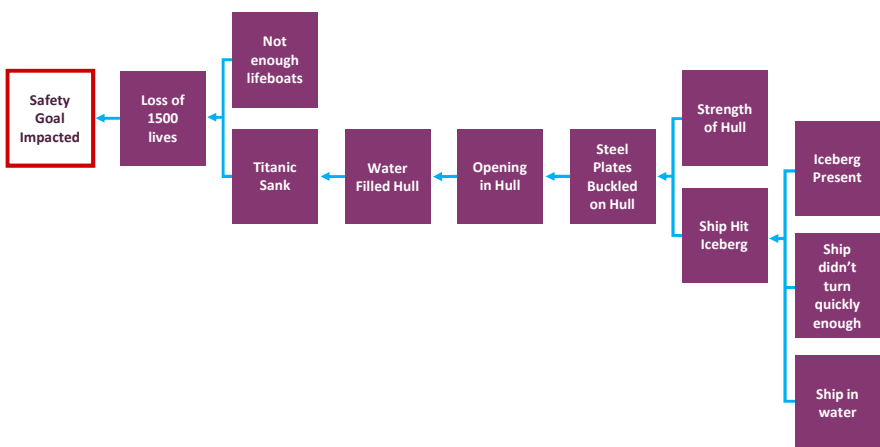

What	Problem(s)	Titanic sank, ship hit iceberg, weak rivets
When	Date, Time	14 th April 1912
Where	Physical Location	North Atlantic
	Process Location	Passengers UK to US

Impact to the Overall Goals

Safety	1500 Fatalities	
Vessel	Lost entire ship	\$ 7,500,000
Business	Liabilities, business loss	\$ 16,500,000
Frequency	1x	

Titanic Causal Tree

Example: Hotel Kitchen Accident

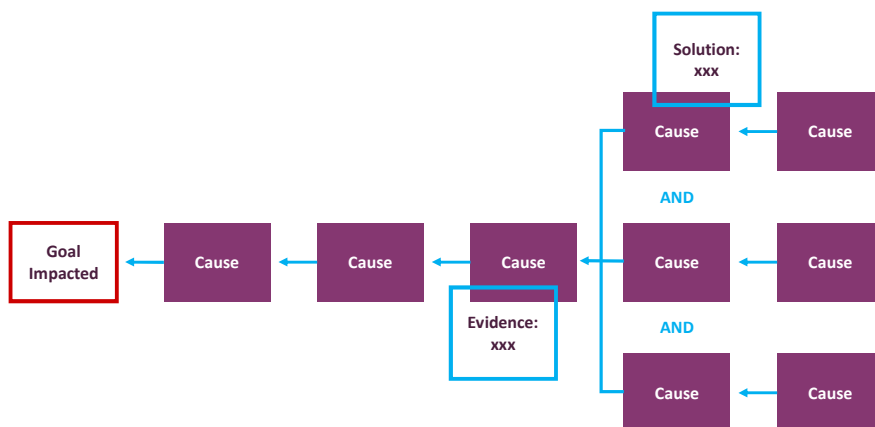

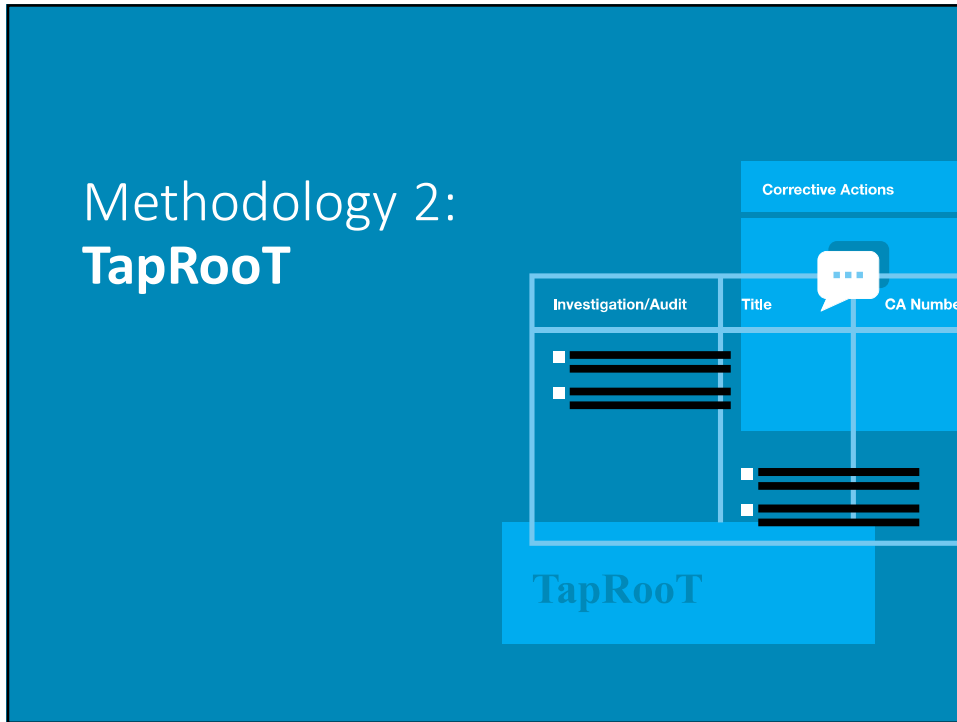

<https://www.youtube.com/watch?v=MwCyVku1HvI>

Problem Definition:

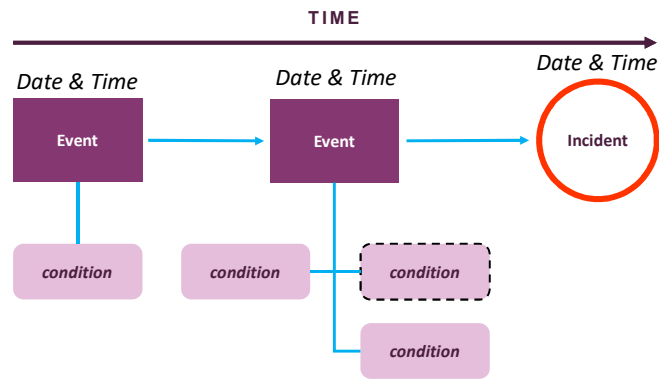

Safety	Cook Seriously Hurt through scalding (burn)	
Business Goal	Liabilities, Business Loss	HKD\$10,000,000

Summary: CauseMapping

TapRoot

Example
